# QUALITY OF LIFE WITHOUT COMPROMISING WORK

## About Quality of Life without Compromising Work

A five-person group with one high-volume hospital and an imaging center was drowning in work, taking calls one week a month in addition to working full days. The grueling schedule and increasing call volume was taking such a toll on the radiologists that a few were contemplating leaving the group.

Within a few months after initial contact, the busy group was no longer in danger of losing its members – the services provided by NightShift allowed those radiologists the ability to enjoy a more balanced work and personal life.

## MAKING THE SHIFT

There are many reasons why a group may consider hiring a teleradiology provider, from the grueling call schedule to the inability to hire top-notch radiologists to balancing the demands of a hospital-based practice with one's personal life. Many times it just makes economic sense to partner with a reputable provider you can trust with your hospital relationships, medical staff, patients and, ultimately, your practice. With a proven track record of reliability, quality and value, NightShift is that provider.

“Our medical staff was reluctant and, now, every hospital is very pleased with the extension of our service.”

-Roger Eng, M.D., Radiologist

## ABOUT NIGHTSHIFT RADIOLOGY

Founded in 2001 by Dr. Eric Trefelner and Dr. Michael Myers, NightShift Radiology is a unique teleradiology provider supporting clients with U.S.-based radiologists, employed full-time by the company. NightShift delivers JCAHO-accredited services through sophisticated, secure and reliable technology backed by meticulous quality assurance and quality improvement processes. All radiologists are directly accessible and the company delivers accurate reports in 20 minutes or less, on average. More than 3 million cases have been read since the company's inception.
