

Since 2001 NightShift Radiology has provided trusted on-call teleradiology solutions nationwide always with the commitment to supporting community-based radiology. Our comprehensive services and **commitment to client satisfaction** is reinforced by our stringent quality assurance and monitoring processes, with millions of cases read throughout the company's history. By partnering with NightShift, you can expand the level of care you provide at the time you need it most, through unparalleled service.

- Why consider NightShift? Because NightShift's belief and business practices have been consistent in its **support of community-based radiology**. This is what makes NightShift different. NightShift has one goal – to be your **trusted partner**, committed to extending your service throughout the night.
- NightShift is focused on helping your business thrive by offering **reliable interpretations**. Upon receipt of images by our radiologists, we provide reads in an average of 20 minutes or less. For facilities seeking to expand their practice and increase workplace efficiency, NightShift is skilled at delivering attentive, personal service during time-sensitive situations. Our advanced network enables rapid image transfer, ensuring a smooth workflow between your facility and our radiologists.
- NightShift is **fully-accredited by The Joint Commission**. We earned The Joint Commission Gold Seal of Approval after a thorough review of our operating policies and procedures, radiologist credentials and our Quality Assurance/Quality Improvement program.
- All NightShift radiologists are **U.S.-based and 100 percent board-certified**. Each radiologist works full time with our group, which means we never hire contractors or locums. Plus, the majority of our radiologists have completed fellowship or advanced training for body or neurological interpretations.
- Each NightShift client hospital receives a **dedicated, direct toll-free phone and fax number** to reach their assigned radiologist. With a single call, ordering physicians or a radiology department can consult with the NightShift radiologist to discuss case details.
- NightShift constantly monitors performance through **a comprehensive Quality Assurance/Quality Improvement program**. Clients receive quarterly QA/QI reports on each of our radiologists, as well as for our practice. With millions of cases read, we offer superior quality with a discrepancy rate of a fraction of one percent for all discrepancy categories.
